

LUMINAIRES - LED FLAT PANEL

AR-LP122C3DD

Product Description:

The Aurora Generation 2 ultra-thin LED panels feature high efficiency, quality and performance. These luminaires are designed with edge-lit technology to produce highly efficient lighting, which provides pleasant and uniform light distribution with no glare. The luminaires have a clean, modern look and the ultra-thin profile makes them unique and an ideal solution for either drop ceilings or suspended in offices, schools, hospitality and other commercial applications. Their high CRI is ideal for retail stores and showrooms where natural color rendering is essential.

The Aurora edge-lit flat panels offer lower power consumption, longer life, dimming option and lower overall maintenance (no re-lamping required) than the standard fluorescent fixture and are therefore an excellent energy efficient replacement. The DLC (DesignLights Consortium®) qualified Aurora edge-lit flat panels are available with a number of options and accessories for application versatility. Compatible with Lutron 0-10V dimmers.
