

OUR ENVIRONMENTAL POLICY

2018/19

Aurora Limited has established a Quality Management System which meets the requirements of EN ISO 9001:2015 and has therefore undertaken to continually improve its environmental performance and ensure compliance with relevant environmental legislation and regulations by obtaining the EN ISO 14001:2015. In order for Aurora Limited to fulfil this undertaking, in an effort to continually improve our system we have implemented the Environmental Management System.

The Companies' Environmental Management System will ensure that procedures are in place to control all processes, materials and products in such a way as to reduce waste and therefor protecting the environment ... energy consumption, minimising waste, using raw materials more efficiently and thus preventing environmental pollution.

The Companies' Environmental Management System, Environmental Objectives and Targets will be reviewed annually, by the Operations Director, to ensure the Companies' continuing commitment to improving the environment through: -

- Educate, train and motivate employees to carry out tasks in an environmentally responsible manner.
- Commit to continually improve the Environmental Management System and enhance environmental performance; review this policy as necessary on at least on an annual basis.
- Encourage environmental protection among suppliers and subcontractors.
- Consider the environmental impacts and sustainability of designs, developments and products at all stages of their life cycle – from design to construction, customer use and final decommissioning or disposal.

This Environmental Policy is communicated to all staff also made available to the public and other interested parties either electronically via the website and/ or hard copy issued on request.

This Environmental Policy is approved by the undersigned and is the authoritative document relating to the Environmental Management within the Company.

Signed 18th May 2018

Keith Mackenzie, Operations Director
